THE SALE AGREEMENT

Date: 12 August 2008

Parties: The Company

Huachang Guangfu, a company incorporated in the PRC, is owned (i) as to 53% by Huaxin Silicon whose equity interest is wholly owned by Mr. Tan,

Annual cap amounts for the Sale Transactions: During the term of the Sale Agreement, the annual maximum amount of the Sale Transactions will not exceed the following amounts:

- (i) RMB225,720,000 for the year ending 31 December 2008;
- (ii) RMB1,212,750,000 for the year ending 31 December 2009; and

The annual cap amounts under the Sale Agreement are determined by reference to (i) the actual quantity of solar wafers produced by the Group in the first half of 2008; (ii) the anticipated increase in wafer production arising from an expansion in the manufacturing bases which is, subject to the prevailing market conditions, expected to reach approximately 48 million, 150 million and 250 million pieces of wafer by end of 2008, 2009 and 2010, respectively; (iii) the anticipated increase in demand from Huachang Guangfu for solar wafers; and (iv) the price of solar wafers sold to Independent Third Parties.

REASONS FOR AND BENEFITS OF ENTERING INTO THE SALE AGREEMENT AND THE PROCESSING AGREEMENT

Huachang Guangfu is a new customer of the Group. Having considered the anticipated increasing demand of solar wafers from Huachang Guangfu whose transaction terms are no less favourable than terms available to other Independent Third Parties, the Directors believe that the entering of the Sale Agreement will enable the Group to secure a potential major customer and thereby enhancing the sale performance and profitability of the Group.

Recycled abrasives and mineral oil cost less than new abrasives and mineral oil. When mixed with new abrasives and mineral oil in a prescribed proportion, the mixture can be used in the slicing of solar wafers from solar ingots. Jinzhou Aoke is principally engaged in the recycling and processing of wire slurry, the factory of which is located in Jinzhou. As such, the Directors consider that it would be cost efficient to engage Jinzhou Aoke to process the Group's wire slurry to recycled abrasives and mineral oil. In addition, with the close proximity between the Company and Jinzhou Aoke, the transportation costs will be lowered when compared with other wire slurry processing companies which are not located in Jinzhou. With the increasing demand for recycled abrasives and mineral oil, the Directors believe that the entering of the Processing Agreement, the terms of which are no less favourable than terms available to Independent Third Parties, will lower the overall production cost which is in line with the Group's strategy.
